

In this video we highlight Cumberland Elementary School's Buddies Program that is designed to support the many life skills required to build peer relationships and teach skills such as turn taking, sportsmanship, being a good buddy and following group expectations. The video also shows the importance of peer modeling and support through play and learning opportunities for students. This video is on our district website as part of our D62 Stories and it was shown at a monthly Board of Education Meeting for our board members and our community.
