

In this video we welcome you to District 62's Newcomers Program, a vibrant classroom where students from diverse backgrounds, spanning countries like Cuba and Russia, come together to learn and grow. Our dedicated team of three teachers provides comprehensive instruction in all core subjects-English, Math, Social Studies, and Science-using engaging, cooperative learning methods. The video shows how the program prioritizes active learning, ensuring students collaborate and participate, rather than passively sitting. While this program is a recent addition to Chippewa, it boasts a successful long history at Algonquin Middle School. This video is part of our 62 Stories, featured on our website, and was also shown at a Board of Education meeting to our board members, as well as the Des Plaines community.
