

In 2019, an audit from Indiana University outlined major, necessary improvements for inclusion in our district. We had work to do. Five years later, we've come a long way. The culmination of a long journey of changing hearts and minds, our annual Unified Game Day is a celebration of what we have achieved with inclusion while acknowledging our continued commitment to become better. We do a short recap video each year that celebrates Game Day to highlight the genuine joy of our students and staff, and to thank our community for their commitment to EVERY student in our district. About 400 students attend Game Day each year. Special education students and their general education classmates participate in games and activities. Parents and community members are invited to volunteer. The video is available on YouTube, and versions of it that are optimized for different social media channels are added to Facebook and Instagram. We monitor sentiment and engagement across these platforms.
