

The purpose of this story was to show a science lesson in action. It was a rare opportunity to show students learning about a solar eclipse as it was happening during the school day. This story aired on GCSTV, our district's cable television channel as well as YouTube, Facebook and Instagram in April 2024. It supports effective communication by showing the greater community what our students are learning in school. It highlighted how the teacher made this lesson interesting, informative and fun! This story was well received by the folks at the high school. It was also viewed nearly 11,000 times online with positive comments.
