

In Fall 2021, District 39 launched a multi-year strategic plan for the first time in district history. As we approached the midway point of the plan, we put together a video that details some of the accomplishments during the first three years. This video, featuring Dr. Kari Cremascoli, our Superintendent, as well as our Strategic Plan Goal Champions includes two professionally produced videos from our strategic plan rollout, including our Portrait of a D39 Scholar. The goal of this video was to bring our strategic accomplishments to life through the video medium and hear our Superintendent speak to the wonderful work we have done and acknowledge the work ahead of us. Our community members have access to written reports and can view Board of Education discussions about our strategic plan, its action steps, and our progress towards our goals. However, this video brings those words to life, helping us reach our digitally connected residents while showcasing all of our hard work and planning.
