

"25 Years of Wolf" was created to celebrate the 25th anniversary of The Wolf School, a small K-8 private special education school in East Providence, RI. Although small, our school and our impact are mighty and this film was created as a way to tell the inspiring story of Wolf. From our founding in 1999 with only 3 students in a rented classroom through our growth to our highest enrollment yet in our permanent home in East Providence - "25 Years of Wolf" honors our past, celebrates our progress, looks forward to our future, and honors all of the incredible people who played a special role in our story. The video premiered at our Discover the Difference event on April 26, 2024 as a way to start the evening and inspire attendees. With past families and staff, alumni students, current parents, staff, donors, and supporters in attendance, "25 Years of Wolf" kicked off the night on an incredibly high note as it inspired attendees with the mission that started our school and still drives us today and shared the tremendous impact we've made in 25 years. This video, above all, was a love letter to the community that has made it all happen. The Wolf School is a one-of-a-kind place because of the people there. "25 Years of Wolf" effectively told the story of Wolf in a way that ignited our community to band together to raise funds for programming and financial aid. After viewing "25 Years" of Wolf, our community helped us raise more than we have ever raised at a Discover the Difference event. Viewers shared that this video helped remind them "what it's all about" and for newer families, it helped them understand more about our humble beginnings and the reason we continue the work that we do. It's never an easy task to tell the history of an organization, especially one as unique as The Wolf School, but "25 Years of Wolf" did so in a digestible, enjoyable, and inspiring way that helped connect all of us through our love of a very special school.
