

Birdseye View: Port Byrons New Playground Opening Day. Overview/Purpose of the Video This video was created to capture the unveiling of the new playground, a key component of the Capital Improvement Project for the Port Byron Central School District campus. The playground serves as a community gathering space for the small rural district, offering a vibrant, engaging environment for students and families. Closed for construction throughout the summer, the playground's progress was closely monitored by students, parents, and the community. When the playground officially opened on the first Friday of the school year, the excitement was palpable. The joy on the students' faces as they explored the new space highlighted the value of the project to both the school and the broader community. The video combines drone footage, ground-level video, and voiceover commentary from Superintendent Jorgensen, along with the sounds of children actively enjoying the space. This immersive approach brings the playground to life, allowing all members of the community to share in the celebration. Result The Capital Improvement playground project has created a welcoming space that the entire Port Byron community can enjoy for years to come. The video successfully showcased the beauty and functionality of the new facility, capturing the joy it brings to students and fostering a sense of pride and unity. The video was prominently shared on social media platforms and highlighted on the front page of the district website. The widespread positive feedback and high engagement rates indicate that the project resonated deeply with the community.
