

The purpose of this video was to introduce the greater community to senior Oshi Asahguui at Grimsley High School as he prepared to graduate. Oshi is an EC student and much beloved throughout the school. The story also shared information about the Project Search program, which some of our EC graduates enter after high school. The story was shared on GCSTV, YouTube, Facebook and Instagram in June 2024. The story supports effective communication by highlighting a population of students who are not often highlighted. The work done by them and the EC staff to get these students ready for life after graduation is impressive. This story was so well received after it was posted. It was viewed online more than 48,000 times and garnered lots of positive comments, not only from the folks at his high school, but by teachers who'd taught Oshi in grade school. They were so happy to learn how well Oshi was doing.
