

Transparency is essential to keeping the school community informed about classroom activities, student well-being, and the allocation of tax dollars. Open communication builds trust, which is why the East Ramapo Superintendents Corner video series was launched in fall 2024. To keep the entire East Ramapo community updated, our team produces brief, informative videos highlighting key district events, instructional developments, and board agenda discussions. Regular updates, shared every few weeks, help ensure that families and stakeholders stay engaged and informed. The subject lines have ranged from announcements about facilities upgrades, new administrative hires, departmental changes and the school budget development process. The first edition of Superintendents Corner featured the Director of Facilities explaining to the Superintendent about the various facilities improvements that were made throughout East Ramapo schools over the summer of 2024. In the January edition of Superintendents Corner, Interim Superintendent Anthony DiCarlo sat down with the Class of 2025 Valedictorians and Salutatorians from Spring Valley and Ramapo High Schools to discuss their outstanding academic achievements and future plans. Superintendents Corner videos are distributed across our social media platforms (YouTube, Facebook, Instagram), emailed, shared via Remind, and prominently featured on all 15 district websites. Both of these videos each reached over 8,000 accounts, were widely shared, and received enthusiastic engagement.
