

Character Spotlights are an initiative created by the JCPS Communications department in partnership with our school mental health department. The goal of these monthly videos is to highlight different faculty and staff members throughout the district who incorporate social and emotional learning into their lessons. They offer a glimpse into their day, demonstrating their dedication to educational growth and positive impact on our students. These videos are posted to our social media channels and sent to staff through email. This initiative is successful as it has given other teachers and staff an opportunity to adopt different classroom actions.
